

DATA SHEET

terminal caps

KA-DFS 2

for DFS, DHS and RH

Article number 09200011

Function

Terminal covers for integrated distribution devices provide additional protection against direct contact. Voltage-carrying terminals can be covered using these covers, thereby reducing the risk of an electric shock when working on distributors, for example. The covers are specially designed for each device. These terminal covers provide protection against direct contact for live terminals with two-terminal or two-terminal-pair designs of the DFS residual current circuit-breakers as well as the DHS main switches.

Features

Increases the protection against direct contact, Easy handling, Plastic as the base material

Mounting

plug-in to terminal

Applications

Terminal covers can be used on all distributors in which the corresponding switching devices are used, e.g. in residential and purpose-built buildings, as well as commercial buildings.

Technical Data

Technical Data	KA-DFS 2
Series	KA-DFS2
Accessories design	protective cap
Housing shape	triangular
General data	
Installation type	Device extension
Housing material	thermoplastic
Width	35 mm
Height	17 mm
Depth	18 mm
Weight	0.002 kg

Dimensions
