

DATA SHEET

terminal caps

KA-DMS

for DMS

Article number 09200015

Function

Terminal covers for integrated distribution devices provide additional protection against direct contact. Voltage-carrying terminals can be covered using these covers, thereby reducing the risk of an electric shock when working on distributors, for example. The covers are specially designed for each device.

Features

Increases the protection against direct contact, Easy handling, Plastic as the base material

Mounting

plug-in to terminal

Applications

Terminal covers can be used on all distributors in which the corresponding switching devices are used, e.g. in residential and purpose-built buildings, as well as commercial buildings.

Technical Data

Technical Data	KA-DMS
Series	KA-DMS
Accessories design	protective cap
Housing shape	triangular
	General data
Installation type	Device extension
Housing material	thermoplastic
Width	12 mm
Height	20 mm
Depth	17 mm
