

DATA SHEET
base load modules
FS-GZ
for the mains field relay FSE 1
 Article number 09700007

[Internetlink](#)

Function

Base load modules ensure the safe activation of the mains field relay, especially when using low-energy consumers. The FS-GZ base load adaptor plug is used to ensure safe switch-on of the mains field relay for consumers that are supplied via a socket. This is especially required for consumers that need a start voltage equal to the mains voltage in order to switch on. If necessary the FSE 1 can be activated for switch-on using the toggle switch on the FS-GZ as well. The indicator light in the toggle switch indicates the current switching status of the FSE 1.

Features

easy installation in socket for consumer, toggle switch for forcing FSE 1 switch-on, FSE 1 switching status display through indicator light

Mounting

adaptor plugs for protective earthing contact sockets

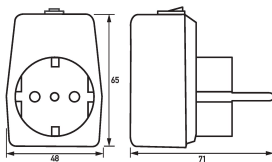

Applications

The components are used in connection with the FSE 1.

Technical Data

Technical Data	FS-GZ
Series	FS-GZ
Accessories design	other
	General data
Installation type	Adaptor plug
Width	48 mm
Height	65 mm
Depth	71 mm
Design requirements/Standards	EN 60715, EN 50022

Dimensions
