

# DATA SHEET <br> installation contactors <br> HS 1-024AC/20-02 <br> with coil voltage 24 V AC <br> Article number 09980405 

## Function

Installation contactors are electromagnetically operated switches. If a control current flows through the magnetic coil, the main circuit closes the magnetic energiser. As long as the control current flows, the switch-on position is maintained. If the control current is interrupted, a spring forces the disconnection o return of the contacts to their original position. This design means that contactors ensure a galvanic separation between the control circuit and the switched circuit whilst simultaneously allowing high currents to be switched. Installation contactors are only designed in a limited way for release and must be protected against overload and short-circuits by upstream protective devices. Installation contactors in the HS family for installation in distribution boards are extremely quiet and have very low-noise switching processes, are highly versatile thanks to their utilisation categories, and have prolonged mechanical and electrical service life. The magnetic coil in this family is suitable for continuous operation ( $100 \%$ duty cycle). This low-noise design is suitable for use in workshop and industrial applications.

## Features

wide range of different contacts, high electrical and mechanical endurance, suitable auxiliary switch and seal cap available

## Mounting

quick fastening to mounting rail, any installation position

## Applications

Installation contactors can be used in a variety of ways. The low-noise version is suitable for industry and workshops, whilst the nonoise version is suitable for hotels, offices and residential areas. They take on the switching of incandescent lamps, fluorescent lamps, transformers for halogen low-voltage lamps, mercury vapour high-pressure lamps (HOL, HPL), metal halide lamps (HOI, HPI), sodium vapour, low and high-pressure lamps, storage heaters and drives (motors).

## Notes

The names of devices in this family contain both the rated current (first pair of digits) and the contact variant (last pair of digits): For example, a $\mathrm{HS} 25-31$ has a rated current of 25 A , three NOC and one NCC, At ambient temperatures of $40^{\circ} \mathrm{C}$ and higher, using the DHDS spacer is recommended, The HS 1 contact is 1 module width wide, and thus the HS 2 and HS 3 are 2 and 3 module widths wide.

spacers DHDS

Technical Data

| Technical Data | $\mathrm{HS} 1-024 \mathrm{AC} / 20-02$ |
| :--- | :---: |
| Series | HS 1 |
|  | control input |
| Rated voltage (AC) | 24 V |
| Rated frequency | $50 \mathrm{~Hz} / 60 \mathrm{~Hz}$ |
| Rated power (switch on) | $7 \mathrm{VA} \ldots 9 \mathrm{VA}$ |
| rated power (retaining) | $2.2 \mathrm{VA} \ldots 4.2 \mathrm{VA}$ |
|  | load circuit |
| Specification | switching contact |
| min. Contact opening | 3 mm |
| contact assignment | 2 NC |
| Rated voltage (AC) | 400 V |
| Rated current (AC) | 20 A |

| Technical Data | HS 1-024AC/20-02 |
| :---: | :---: |
| Rated insulation voltage | 440 V |
| Switching frequency | max. $300 / \mathrm{h}$ |
| Allowed utilization category | AC-1, AC-2, AC-3 |
| Power dissipation per pole AC-1 | 2 W |
| Overvoltage class | I, II, III |
| rated short-circuit current "r" | 3 kA |
| rated short-circuit current "lq" | 3 kA |
| Rated voltage $\mathrm{AC}-1$ (fix) | 230 V |
| max. Rated power AC-1 230 V | 4.6 kW |
| Rated voltage AC-3 one-phase (fixed) | 230 V |
| max. rated power glow lamps | 2160 VA |
| max. Rated power fluorescent lamp compensated | 1020 VA |
| max. Rated power fluorescent lamp not compensated | 935 VA |
| max. rated power fluorescent lamps duo-switching | 2320 VA |
| max. inrush current LED | 195 A |
| contact endurance AC-1 | 100000 switching cycles |
| contact endurance AC-3 | 150000 switching cycles |
| Duration of light arcs | $10 \mathrm{~ms} . . .15 \mathrm{~ms}$ |
| Switching delay, open | $6 \mathrm{~ms} . . .12 \mathrm{~ms}$ |
| Switching delay, close | $7 \mathrm{~ms} \ldots 16 \mathrm{~ms}$ |
| quiet design | false |
|  | screw-type terminal M3.5 top and bottom (load circuit) |
| Allowed types of wires | aluminium conductor, copper conductor, solid conductor, flexible conductor |
| Connection C1 Maximum number of conductors per terminal | 1 |
| Cross section solid | 1-wire: $1.5 \mathrm{~mm}^{2} \ldots 10 \mathrm{~mm}^{2}$ |
| Connecting capacity flexible | 1-wire: $1.5 \mathrm{~mm}^{2} \ldots 6 \mathrm{~mm}^{2}$ |
| Cross section flexible with ferrule | $1.5 \mathrm{~mm}^{2} \ldots 6 \mathrm{~mm}^{2}$ |
| Cross section stranded | 1-wire: $1.5 \mathrm{~mm}^{2} \ldots 10 \mathrm{~mm}^{2}$ |
| Tightening torque | $0.8 \mathrm{Nm} \ldots 1.4 \mathrm{Nm}$ |
|  | screw-type terminal $\mathrm{M}_{3}$ top and bottom (control input) |
| Allowed types of wires | aluminium conductor, copper conductor, solid conductor, flexible conductor |
| Connection C2 Maximum number of conductors per terminal | 1 |
| Cross section solid | 1-wire: $0.75 \mathrm{~mm}^{2} \ldots 2.5 \mathrm{~mm}^{2}$ |
| Connecting capacity flexible | 1-wire: $0.5 \mathrm{~mm}^{2} \ldots 2.5 \mathrm{~mm}^{2}$ |
| Cross section flexible with ferrule | $0.5 \mathrm{~mm}^{2} \ldots 1.5 \mathrm{~mm}^{2}$ |
| Cross section stranded | 1-wire: $0.75 \mathrm{~mm}^{2}$... $2.5 \mathrm{~mm}^{2}$ |
| Tightening torque | 0.6 Nm ... 1.2 Nm |
|  | General data |
| Duty cycle | continuous operation (Duty cycle $\leq 100 \%$ ) |
| Operating position | optional |
| Mechanical endurance | min. $10 \cdot 10^{6}$ switching cycles |
| Electrical endurance | min. $1 \cdot 10^{6}$ switching cycles |
| Ambient temperature | Max. $60^{\circ} \mathrm{C}$ with spacer |
| Ambient temperature | $-40^{\circ} \mathrm{C} \ldots 40^{\circ} \mathrm{C}$ |

| Technical Data | HS 1-024AC/20-02 |
| :--- | :---: |
| Housing type | distribution board housing |
| Installation type | Mounting rail (35 mm) |
| Housing material | thermoplastic |
| Protection class | IP20 |
| Width | 18 mm |
| Height | 85 mm |
| Depth | 65 mm |
| Installation depth | 60 mm |
| Module widths | 1 |
| Design requirements/Standards | EN 60715, EN 60947-4-1, VDE 0660-102 |
| Degree of pollution according to | 3 |
| EN 60664 |  |
