

DATA SHEET

terminal caps

RH-KA

for DFS, DHS and RH

Article number 09981069

[Internetlink](#)

Function

Terminal covers for integrated distribution devices provide additional protection against direct contact. Voltage-carrying terminals can be covered using these covers, thereby reducing the risk of an electric shock when working on distributors, for example. The covers are specially designed for each device. These terminal covers provide protection against direct contact for live terminals with two-terminal or two-terminal-pair designs of main switches in the RH series. Corresponding recesses enable them to be sealed.

Features

Increases the protection against direct contact, Easy handling, Plastic as the base material

Mounting

plug-in to terminal

Applications

Terminal covers can be used on all distributors in which the corresponding switching devices are used, e.g. in residential and purpose-built buildings, as well as commercial buildings.

Technical Data

Technical Data	RH-KA
Series	RH-KA
suitable for	Main switches RH
Accessories design	protective cap
Housing shape	triangular
	General data
Mounting type	Device extension
Housing material	thermoplastic
Width	17 mm
Height	19 mm
Depth	10.5 mm
