DATA SHEET

restart locks
RH-SPE

for series RH/ AFDD/ DRCBO 3

Article number 09981115

Function

This equipment prevents the unintentional activation of switching devices, e.g. during maintenance work. RH-SPE interlocks prevent the relevant switching device from switching on. They allow for implementation of protective measure 'secure against restart' during maintenance and repair work. The interlocks can be sealed or secured using a conventional padlock (shackle diameter up to 3.5 mm).

Features

quick and universal use, sealable, lockable with a conventional padlock

Mounting

Mounting directly on the toggle of the switching device

Applications

For general protection from switching on or off power supplies to residential and purpose-built buildings as well as industrial facilities.

Technical Data

Technical Data	RH-SPE
Accessories design	restart lock
	General data
sealable	true
Width	24 mm
Height	17 mm
Depth	8 mm
